

ADVANCED ISO 31000 COURSE

CERTIFIED RISK MANAGEMENT IMPLEMENTATION PROFESSIONAL

WHY SHOULD YOU ATTEND THIS COURSE?

CHAPTER ONE

Our "Advanced" certification training is meticulously crafted for managers aspiring to integrate the ISO 31000 guidelines, principles and process into their organisational framework and it is also fashioned for consultants eager to specialize in this domain.

This comprehensive program is designed to equip participants for the esteemed GNIC® CRMIP® certification, denoting proficiency as a *"Certified Risk Management Implementation Professional for ISO 31000 - Advanced Level"*.

To derive maximum benefit from this course, a foundational understanding of the ISO 31000 standard and organisational structures is recommended. We recommend our ISO 31000 "Foundations" level course with the CRMF® certification to acquire a profound knowledge and understanding of this standard, should this still be lacking.

The immersive nature of our "Advanced" training is best suited for residential settings, fostering a high level of participant interaction that is integral to the learning experience.

This comprehensive program aims to empower participants by providing them with the essential tools, knowledge, and insights necessary to effectively apply the guidance outlined in the ISO 31000 standard. The focus is on transforming this understanding into a robust framework and actionable implementation plan. The program covers crucial elements, including the development of an approved communication approach.

By completing this program, participants will be equipped to promptly initiate the harmonization of their organisation with the ISO 31000 standard. They will learn how to translate the ISO 31000 principles into competencies and behaviour, driving a culture of excellence. Furthermore, they will understand how to seamlessly integrate the risk management process outlined in ISO 31000 into decision-making processes across all levels and functions within the organisation. This integration ensures the facilitation of informed decision-making, the adoption of a culture of continuous improvement, and the attainment of outstanding organisational performance. The overarching goal is to cultivate an environment where sound risk management practices contribute to better decision outcomes, fostering ongoing excellence within the organisation.

Who would benefit from this course?

— Who should attend?

The CRMIP® course is ideal for managers and consultants seeking to enhance their expertise in risk management and integrate ISO 31000 guidelines, principles and process into their organisational practices. Specifically, it is designed for:

- **Managers:** Those responsible for decision-making and strategic planning within an organisation will benefit from the course. This includes executives, directors, and other managerial roles across various functions.
- **Consultants:** Individuals working as consultants and aiming to specialize in the domain of ISO 31000 risk management will find the course valuable for developing specialized knowledge and skills.
- **Risk Management Professionals:** Professionals directly involved in risk management processes or aspiring to advance their skills in this field will gain practical insights and tools for implementation.
- **Organisational Leaders:** Leaders who want to foster a culture of continuous improvement and informed decision-making within their organisations will find the course beneficial.

Overall, the CRMIP® course caters to a diverse audience involved in decision-making, risk management, and organisational leadership, providing them with the necessary skills to implement the ISO 31000 guidance for managing organisations effectively.

CHAPTER TWO

- **Those with a Foundational Understanding of ISO 31000:** While the course is designed for advanced participants, individuals with a foundational understanding of ISO 31000 and organisational structures will find it particularly relevant.
- For those lacking this foundation, the option to take the ISO 31000 “Foundations” level course (CRMF®) is recommended.
- **Auditors:** Both internal and external, stand to gain valuable insights and expertise by attending the CRMIP® course. The program offers an opportunity for auditors to deepen their knowledge of risk management and the implementation of ISO 31000 principles, enabling them to conduct more comprehensive and effective audits. The specialized focus on risk management, coupled with the prestigious GNIC® CRMIP® certification, enhances auditors' credentials and signifies their proficiency in risk management implementation. The course covers the integration of ISO 31000 guidelines, principles, and process, the development of a framework, including an approved communication approach, and fosters a culture of continuous improvement, allowing auditors to contribute meaningfully to organisations' risk management practices and decision-making processes.

How will you benefit from this course?

CHAPTER THREE

— What's in it for you?

Participants in the CRMIP® course will derive substantial benefits tailored to their roles and responsibilities:

Managers: Those in decision-making and strategic planning roles will gain practical insights and tools for integrating ISO 31000 principles and process into their organisational practices. This includes fostering a culture of continuous improvement and informed decision-making, contributing to overall organisational success.

Consultants: Individuals aiming to specialize in ISO 31000 risk management will acquire valuable knowledge and skills, enhancing their consultancy capabilities. The course provides specialized insights into risk management implementation, positioning consultants as experts in the field.

Risk Management Professionals: Professionals directly involved in risk management processes will gain practical insights and tools for effective implementation. The course enhances their proficiency in risk management and provides a comprehensive understanding of ISO 31000 guidelines.

Organisational Leaders: Leaders aspiring to foster a culture of continuous improvement will find the course beneficial for enhancing decision-making processes within their organisations. The focus on ISO 31000 principles equips leaders to lead their teams toward effective risk management practices.

Individuals with a Foundational Understanding of ISO 31000: Participants with a foundational understanding will further enhance their knowledge and relevance in risk management. The option to take the "Foundations" level course (CRMF®) ensures a well-rounded understanding of ISO 31000 and organisational structures.

Auditors: Internal and external auditors will deepen their knowledge of risk management and ISO 31000 principles, enabling them to conduct more comprehensive audits. The GNIC® CRMIP® certification enhances their credentials, signifying expertise in risk management implementation and aligning audit practices with international standards.

Overall, the CRMIP® course empowers participants to implement ISO 31000 guidelines effectively, fostering a culture of continuous improvement, informed decision-making, and outstanding organisational performance across diverse roles and responsibilities.
